

Life Science Guide 2011

To make the Life Science Guide 2011 more manageable, we have carried out a categorization based on the various companies' fields of activities within life science. Below you find a brief description of the categories. After the listing of companies divided into categories, you will find the full alphabetical list of the companies with background informations.

Biotech

- Companies working with research and development of drug candidates.

Conference Centre

- Companies working with hosting/consultancy related to conferences and visitors at meetings and events in the region.

Contract Research Organisation

- Companies providing contract services within research and development to life science companies.

Diagnostics

- Companies specializing in development of methods or design of equipment for monitoring and diagnosing of diseases.

Drug Discovery

- Companies working with development and discovery of drugs, but not involved in the production or marketing of products.

Equipment/Distributor

- Companies distributing equipment for use within life science research, development and production.

Equipment/Manufacturer

- Companies manufacturing laboratory or production equipment for use within life science research, development and production.

Intellectual Property Consulting

- Companies working with patents and intellectual property, including protection and commercialization of ideas and inventions.

Investor

- Companies working with investments, development of portfolios and investment consultancy of life science companies, including collective investment funds, investment companies and venture companies (Venture Capital).

IT & Consultancy

- Companies developing IT technology, products and services used as tools for problem solution, development and analysis of elements within life sciences.

Medical Devices

- Companies developing and manufacturing medical devices.

Network Organisation

- Organisations within biotech and life sciences seeking to improve the framework conditions for companies and to create international awareness of the industry in the region.

Pharma

- Companies developing, testing or manufacturing innovative medicinal products/pharmaceuticals and responsible for the marketing of the product.

Production, Engineering & Consulting

- Companies providing raw materials, equipment/components, production facilities or contract production services for companies within Biotech and Pharma.

Recruitment

- Companies establishing contact between companies and candidates within life sciences, including job portals and recruitment services.

Region/City

- Regions and cities able to offer life science companies attractive areas with focus on location, infrastructure and recreational areas.

Services

- Companies providing assistance and important services for life science companies.

Transport/Logistics

- Companies providing transport and logistics services for the life science industry.

University

- Institutions of higher education with educations relevant to persons in life science companies and institutions.

cyncron
//COMMUNICATION //COMPETENCE //CONTINUITY

**// YOUR PARTNER FOR CLINICAL TRIALS
IN THE NORDIC REGION!**

**// Cyncron is a full service
phase I-IV contract research
organization (CRO), offering
full and flexible clinical trial
services.**

// We offer services within:

- Clinical Operations
- Biometrics (statistics, programming,
and data management)
- DMC/DSMB
- Medical Affairs
- Quality Management
